Binary Classification

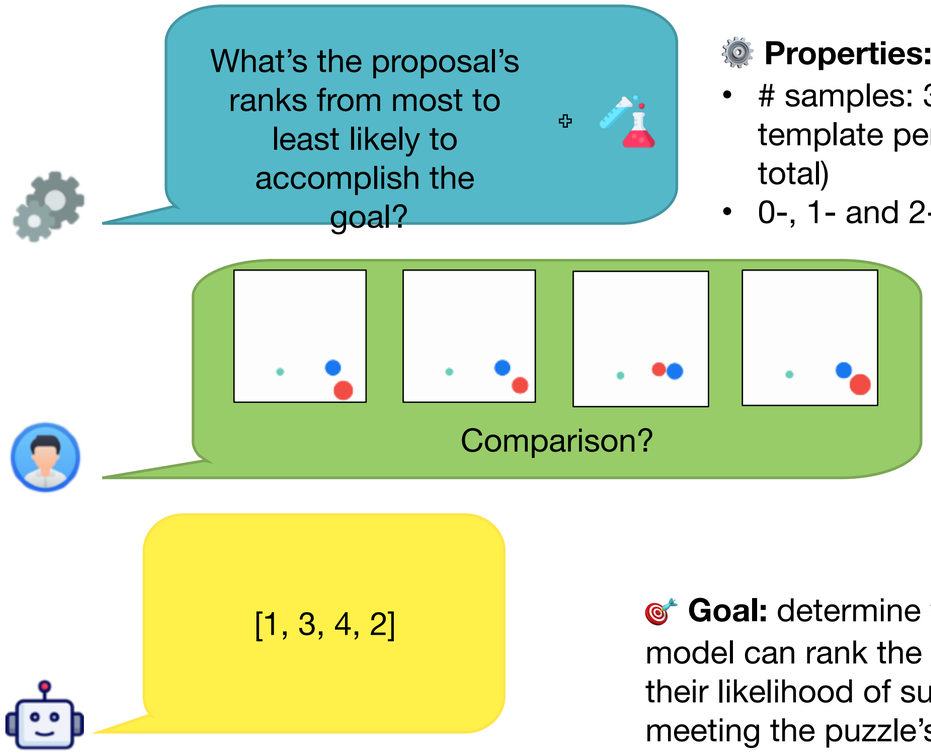

⚙️ **Properties:**

- # samples per model: 3 sample per proposal type per configuration per template (3000 total)
- 0-, 2- and 4-shot examples, with 1 or 2 frames each

🎯 **Goal:** measure the predictions abilities with different types of contexts

Ranking Task

⚙️ **Properties:**

- # samples: 3 samples per template per configuration (450 total)
- 0-, 1- and 2-shot examples

🎯 **Goal:** determine weather the model can rank the proposals by their likelihood of successfully meeting the puzzle's goal
